HIV, 147 (1998) 173; 151 (1998) 99; 152 (1998) 29
HIV/AIDS, 148 (1998) 83
HIV-1, 152 (1998) 143; 154 (1998) 57
HIV transmission, probability of, 152 (1998) 29
Homoclinic orbit, 148 (1998) 7
Homoclinic tangency, 150 (1998) 43
Homosexual populations, 152 (1998) 29
Hopf bifurcation, 149 (1998) 57, 167
Host/parasite phylogeny, 149 (1998) 191

Immune response, 154 (1998) 57
Immunity coverage, critical, 147 (1998) 23
Immuno-epidemiology, 151 (1998) 179
Impermanence, 152 (1998) 1
Incidence bounds, 148 (1998) 161
Individual behavior, 148 (1998) 65
Infection-dependent matching, 148 (1998) 161
Infection period, effect of variability in, on persistence and spatial spread of infectious diseases, 147 (1998) 207
Infection without recovery, effect of pair formation and variable infectivity on spread of, 148 (1998) 83
Infectious disease models with dynamic partners, 150 (1998) 153

Infectious disease, 148 (1998) 161; 149 (1998) 23 spatial spread, 147 (1998) 207
Inhibitor, 148 (1998) 147
Input impedance data, extracting cable parameters from, 153 (1998) 1
Irradiated cells, misrejoining DNA fragments in, 149 (1998) 107
Irradiation time, 152 (1998) 179

Jungles, 149 (1998) 191
Juxtacrine cell signalling, 153 (1998) 125

Kalman filter, 152 (1998) 29

Leukemia, 150 (1998) 113
Liebig s law, reconstructing, 149 (1998) 1
Limit cycle, 149 (1998) 167
Limit theorems, 150 (1998) 153
Lineal equation for the classification of progressive and hyperactive spermatozoa, 149 (1998) 77
Lyapunov function, 152 (1998) 1

Marine bacteriophage infection, 149 (1998) 57
Mathematical biology, 151 (1998) 219, 227
Mathematical model, of cell dynamics in the granulosa of ovulatory follicles, 152 (1998) 123
of drug resistance: heterogeneous tumors, 147 (1998) 41
of the dynamics of scrapie, 153 (1998) 79
of finite uniform cable, 153 (1998) 1
of growth of population of fish in the larval stage, 150 (1998) 1
of HIV-1 infection, 154 (1998) 57
of human respiratory stability, 152 (1998) 105
of infectious disease, 150 (1998) 153
of juxtacrine cell signalling, 153 (1998) 125
of purine metabolism in man, 151 (1998) 1
of viral dynamics in HIV-1 infected patients, 152 (1998) 14
Mathematical relationships in prokaryotic transcription, 151 (1998) 155
Mechanical models, spatially varying equilibria of, 147 (1998) 113
Mendelian games, spatial, 151 (1998) 199
Mesoscopic bistability, 147 (1998) 1
Microbial populations, coexistence of three competing, 154 (1998) 87
oscillations of two competing, 148 (1998) 43
Misrejoining DNA fragments in irradiated cells, 149 (1998) 107
Model for hepatocarcinogenesis, 148 (1998) 181
Model of dengue disease transmission, 150 (1998) 131
Model of multiple tumorigenesis, 150 (1998) 63
Model of plankton allelopathy, 149 (1998) 167
Model of plasmid-bearing, plasmid-free competition in the chemostat with nutrient recycling and an inhibitor, 148 (1998) 147
Model of predatory switching, 151 (1998) 165
Modeling and analysis of a marine bacteriophage infection, 149 (1998) 57
Modeling carcinogenesis, 152 (1998) 179
Modeling the covarion hypothesis of nucleotide substitution, 147 (1998) 63
Modeling leukemia, 150 (1998) 113
Monte Carlo studies, 147 (1998) 173
Morphogenesis, 147 (1998) 113
Most recent common ancestor (MRCA), 153 (1998) 41
Mutation, 149 (1998) 95
Mutations on a coalescent tree, ages of, 153 (1998) 41
Myotonic dystrophy locus, 147 (1998) 93

Nagumo dynamics, unique wave front for dendritic spines with, 148 (1998) 205
Neural dynamics, and nonstationarity in epileptic EEG, 147 (1998) 1
Neurosciences, 147 (1998) 227
Non-linear dual-sorption model of percutaneous drug absorption, 152 (1998) 87
Nonstationarity in epileptic EEG, 147 (1998) 1
Nucleotide substitution, 147 (1998) 63
Nutrient limitation, 149 (1998) 1
Nutrient recycling, 148 (1998) 147

Observation model, 152 (1998) 29
One-dimensional map, 150 (1998) 43
Optimal harvesting, 152 (1998) 63 with both population and price dynamics, 148 (1998) 129
Optimal harvesting policy, 152 (1998) 165
Optimal vaccination strategies, 151 (1998) 135
Oscillations of two competing microbial populations in configurations of two interconnected chemostats, 148 (1998) 43

Pair formation and variable infectivity, 148 (1998) 83
Parameter estimation, 150 (1998) 21
Partial differential equations, 149 (1998) 37; 150 (1998) 177; 153 (1998) 79
Partial inbreeding, 151 (1998) 123
Passive neurones, 149 (1998) 137
Percutaneous drug absorption, 152 (1998) 87
Persistence, 147 (1998) 207; 148 (1998) 147; 149 (1998) 57; 151 (1998) 165
Pharmacokinetics, 152 (1998) 87
Pharmacology, 147 (1998) 227
Phylogenetics, 153 (1998) 41
Phylogeny reconciliation, 149 (1998) 191
Plankton ecology, 149 (1998) 167
Poliomyelitis eradication, 150 (1998) 83
Population diffusion, 149 (1998) 37
Population dynamics, 148 (1998) 1, 65; 153 (1998) 13
Population models for the dynamics of food chains, 153 (1998) 99
Population and price dynamics, optimal harvesting with both, 148 (1998) 129
Population size, effective, 151 (1998) 123
Potential distribution, in ventricular model, 151 (1998) 51
Predatory switching, 151 (1998) 165
Prendiville process, non-homogeneous, 148 (1998) 1
Preneoplastic lesions, 148 (1998) 181
Prey–predator system, 151 (1998) 165
Price dynamics, 148 (1998) 129
Price uncertainty, 148 (1998) 129
Primary infection, 154 (1998) 57
Probability of HIV transmission, 152 (1998) 29
Prokaryotic transcription, 151 (1998) 155
Protease inhibitors, 152 (1998) 143
Purine metabolism, 151 (1998) 1

Radiation track, interaction with molecular targets, 154 (1998) 103
Random vaccine reponse, 154 (1998) 117
Receptor-channel complexes, an algorithmic method for determining the kinetic system of, 147 (1998) 227
Reflection principle, 150 (1998) 83
Reparameterisations, locally identifiable, of unidentifiable non-linear systems, 148 (1998) 21
Respiratory system, 152 (1998) 105

Saddle point method, use in sociobiological modeling, 151 (1998) 199
Schistosomiasis immuno-epidemiology, 151 (1998) 179
Schur-concave, 148 (1998) 115
Scrapie, 153 (1998) 79
Segregation distortion and selection, dynamic balance, 147 (1998) 93
Sequential algorithm for the non-linear dual-sorption model of percutaneous drug absorption, 152 (1998) 87
Sexage-dependent populations with random mating and females pregnancy, 153 (1998) 13
Sexual activity, 151 (1998) 99
Sheep, 153 (1998) 79
Shil'nikov homoclinic bifurcation, 153 (1998) 99
Short-term projection, 150 (1998) 21
Signal range, 153 (1998) 125
Similarity transformation, 148 (1998) 21
Simulation, 150 (1998) 21
Singular perturbation, 148 (1998) 7
S-I-R epidemic model, 150 (1998) 177
Social networks, 150 (1998) 153
Somatic shunt cable model for passive neurones, 149 (1998) 137
Spatial heterogeneity, 154 (1998) 87
Speed of first spread, 151 (1998) 199
Speed of wave front, 148 (1998) 205
Spermatozoa, progressive and hyperactive, 149 (1998) 77
Spine density, 148 (1998) 205
Spread of excitation in 3-D models of the anisotropic cardiac tissue. II. Effects of fiber architecture and ventricular geometry, 147 (1998) 131
III. Effects of ventricular geometry and fiber structure on the potential distribution, 151 (1998) 51 SSEB model, 149 (1998) 107
S-system, 151 (1998) 1
Stability, 152 (1998) 105
State-dependent delay equations, 150 (1998) 1
State space model for the HIV epidemic in homosexual populations, 152 (1998) 29
Statistical certification of eradication of poliomyelitis in the Americas, 150 (1998) 83
Stochastic dynamics of an epidemic, 152 (1998) 13
Stochastic growth, 148 (1998) 129

Stochastic model, of carcinogenesis, 150 (1998) 63
of cellular transformation, 149 (1998) 95
of schistosomiasis immuno-epidemiology, 151 (1998) 179
Stochastic modeling, 147 (1998) 173
of the dynamics of CD4+ T-cell infection by HIV, 147 (1998) 173
Stochastic population model, 150 (1998) 21
Stochastic processes, 150 (1998) 83, 153
Strong uniform repeller, 149 (1998) 57
Structured population model, 150 (1998) 21
Survival functions, 153 (1998) 63
Symmetric random walk, 150 (1998) 83
Symptom in Bartoszyński's virus model, 153 (1998) 63
Systematics, 149 (1998) 191

Threshold densities, 152 (1998) 63
Threshold number, 150 (1998) 131
Time delay, 149 (1998) 167
Time-dependent logistic equation with periodic coefficients, 152 (1998) 165
Track structure, 154 (1998) 103
Transformation, cellular, 149 (1998) 95
Transforming growth factor α (TGFα),153 (1998) 125
Traveling wave front, 148 (1998) 205
Tuberculosis, age-structure model, 151 (1998) 135
Tumorigenesis, 150 (1998) 63

Unicellulars, multiple nutrient limitation in, 149 (1998) 1
Unidentifiable non-linear systems, locally identifiable reparameterisations of, 148 (1998) 21
Urethane, biological effects of, 150 (1998) 63

Value of the opportunity to harvest, 152 (1998) 63
Variable infectivity, 148 (1998) 83
Variance components, estimation based on diallel model, 150 (1998) 105
Ventricular geometry, 147 (1998) 131; 151 (1998) 51
Viral dynamics, 152 (1998) 143
Viral load, in HIV-1, 152 (1998) 143
Vital rate distribution, 150 (1998) 21

Wound healing, 153 (1998) 125
